

Testimony of Steven David of Storrs, Mansfield CT.

My name is Steven David. I am currently enrolled as a student of UCONN and am an active member in the non-partisan consumer advocacy organization, UConnPIRG. I want to thank Senator Maynard, Representative Guerrera and the members of the transportation committee for providing me this opportunity to speak. I am originally from the DC Metropolitan area, upon moving to Connecticut one of the biggest issues that I found myself facing when traveling in-between the family I have here, New Jersey, and DC is the massive amount of traffic we have to deal with. Aside from the environmental benefits that a much larger transit system, having a larger and more functional mass transit system would help people like me stay connected and our families and find jobs within the state after graduating.

Thank you for your time.

Steven David
